LABOR MARKET INDICATORS (12-month Averages)

State of Florida	Year Ending September 1982	Year Ending September 1981	Percent Change
Civilian Labor Force	4,686,100	4,445,600	5.4
Employment	4,325,000	4,162,400	3.9
Unemployment	361,100	283,200	27.5
Unemployment Rate	7.7	6.4	XXX
Nonagricultural Wage and Salary Employment	3,777,000	3,689,000	2.4
Unemployment Compensation Initial Claims	42,100	29,400	43.2
Insured Unemployment	81,000	59,800	35.5

LABOR MARKET INDICATORS: Unemployment in Florida continues to rise, according to the 12-month average labor market indicators. The average unemployment rate for the year ending September 1982 was 7.7 percent, up significantly from the 6.4 percent rate for the year ending September 1981. However, the state continues to experience a lower unemployment rate than the nation.

The number of persons who were unemployed in Florida increased by 27.5 percent between the two 12-month periods while employment increased by only 3.9 percent. Additionally, claims for unemployment compensation increased dramatically between the two periods. The number of initial claims filed was up 43.2 percent and insured unemployment increased 35.5 percent.

LABOR FORCE SUMMARY

State of Florida	September 1982	August 1982	July 1982	June 1982
Civilian Labor Force	4,941,000	4,832,000	4,769,000	4,690,000
Employment	4,570,000	4,458,000	4,419,000	4,339,000
Unemployment	371,000	374,000	350,000	351,000
Unemployment Rate	7.5	7.7	7.3	7.5

Note: Data are taken from the monthly results of the Current Population Survey (CPS) and are primarily for use in allocation of money under various federal programs, including CETA. Data are seasonally adjusted.

Release Date: November 1982

Letter No. 407

THE NATION IN SEPTEMBER: The nation's unemployment rate rose to 10.1 percent in September, the first time it has reached double figures in more than 40 years. This seasonally adjusted rate compares unfavorably with the 9.8 percent rate for August and the 7.5 percent rate recorded in September 1981.

After seasonal adjustment, unemployment rose by 450,000 from August to September, reaching a level of 11.3 million. Adult men over 25 years of age accounted for most of this increase. The jobless rate for men aged 20 and over rose to 9.6 percent in September while the rate for adult women stood at 8.3 percent. The unemployment rates for blacks and teenagers continue to be the highest, rising to 20.2 percent and 23.7 percent, respectively. The rate for whites increased to 9.0 percent and Hispanics recorded an unemployment rate of 14.6 percent.

HOURS AND EARNINGS: During the 3rd quarter of 1982, average weekly wages for manufacturing rose \$11.59 (4.3 percent) and were 9.9 percent above December 1981. Average hourly earnings were up \$.31 and \$.65 over June 1982 and December 1981, respectively. Average weekly hours dropped from 39.3 hours to 38.8 hours. Average hourly earnings rose in July and September although the number of hours worked per week declined in both months. Most industry levels showed significant increases in average weekly earnings during the third quarter of 1982. All nonmanufacturing industries reporting wage information showed average weekly hours of more than 40 hours per week.

NONAGRICULTURAL EMPLOYMENT: Total nonagricultural employment in Florida decreased by 17,000 from June to September. Large decreases occurred in July and August due to the expected seasonal declines in the manufacturing, trade, services, and government industries. Two industry groups, construction and manufacturing, continue to be affected by the current recession in addition to the normal seasonal influences on the economy.

On a seasonally adjusted basis, total nonagricultural employment increased by 46,400 over the quarter, with increases in July and September. These increases were primarily in the services and government categories. Construction and government have each shown only one monthly increase in 1982, both occurring in the third quarter.

Nonagricultural employment grew by 46,800 (1.3 percent) from September 1981 to September 1982. Only mining, manufacturing, and construction showed over-the-year decreases among the major industry groups.

Below are the 20 occupations with the greatest number of job openings listed with Florida State Employment Service offices during the third quarter of 1982:

Occupation	Openings Received	Openings Filled	Average Hourly Wage Offered
Clerk, General	6,471	4,965	3.42
Construction Worker I	2,937	1,875	4.21
Cleaner, Commercial or Institutional	2,747	1,255	3.47
Clerk-Typist	2,256	774	3.96
Janitor	2,088	862	3.43
Secretary	1,838	383	4.56
Cleaner, Housekeeping	1,449	789	3.47
Material Handler	1,354	1,169	3.88
Construction Worker II	1,207	969	4.14
Day Worker	1,068	921	4.06
Kitchen Helper	1,052	699	3.45
Administrative Clerk	920	344	4.04
Groundskeeper, Industrial-Commercial	899	649	3.69
Waiter/Waitress, Informal	886	525	3.45
Laborer, Stores	886	673	3.67
Carpenter	875	554	5.97
Guard, Security	864	573	3.71
Cook	860	543	3.83
Salesperson, General Merchandise	856	98	3.56
Maintenance Repairer, Building	855	557	4.16

This public document was promulgated at an annual cost of \$3,018.48, or \$.44 per copy, including postage, to provide current state labor market data and an analysis of changes in the state economy as required under the terms of the cooperative agreement between the Florida Department of Labor and Employment Security and the U.S. Department of Labor, Bureau of Labor Statistics.

These average earnings are computed on a "gross" basis and reflect changes in premium pay for overtime and late shift work as well as changes in basic hourly and incentive rates. Estimates are for all full-time production and related workers who are employed during the pay period including the 12th of the month.

LABOR MARKET INDICATORS (12-month Averages)

State of Florida	Year Ending December 1982	Year Ending December 1981	Percent Change
Civilian Labor Force	4,769,500	4,513,100	5.7
Employment	4,379,800	4,205,300	4.1
Unemployment	389,700	307,800	26.6
Unemployment Rate	8.2	6.8	XXX
Nonagricultural Wage and Salary Employment	3,780,800	3,721,700	1.6
Unemployment Compensation			
Initial Claims	44,500	31,300	42.2
Insured Unemployment	88,700	59,800	48.3

LABOR MARKET INDICATORS: The average unemployment rate during 1982 for Florida was 8.2 percent, up significantly from the 6.8 percent average jobless rate recorded in 1981. This increase was the result of unemployment increasing by 26.6 percent and employment increasing by only 4.1 percent between the two years. The number of initial claims filed for unemployment compensation increased a substantial 42.2 percent and insured unemployment rose 48.3 percent.

LABOR FORCE SUMMARY

State of Florida	December 1982	November 1982	October 1982	September 1982
Civilian Labor Force	4,892,000	4,967,000	4,972,000	4,941,000
Employment	4,406,000	4,495,000	4,540,000	4,570,000
Unemployment	486,000	472,000	432,000	371,000
Unemployment Rate	9.9	9.5	8.7	7.5

Note: Data are taken from the monthly results of the Current Population Survey (CPS) and are primarily for use in allocation of money under various federal programs, including CETA. Data are seasonally adjusted.

THE NATION IN DECEMBER: The seasonally adjusted unemployment rate for the Nation in December was 10.8 percent, up only slightly from November's rate of 10.7 percent. However, December's rate became the highest since the Great Depression and marked the eleventh straight month in which an increase occurred. The jobless rate in December 1981 was 8.8 percent.

The average unemployment rate in 1982 was 9.7 percent, up significantly from the 1981 average rate of 7.6 percent. Employment declined by 0.9 percent while unemployment rose by 29.1 percent between the two years. The rate for adult men rose from 6.3 percent to 8.8 percent while the rate for adult women increased much less, from 6.8 to 8.3, as it fell below the rate for adult men for the first time in a long while. Teenagers and nonwhites continued to experience the highest rates of unemployment as their 1982 jobless rates were 23.2 percent and 17.3 percent, respectively.

HOURS AND EARNINGS: Average hourly earnings in manufacturing during the fourth quarter of 1982 remained relatively stable, dropping by only two cents from September to December. In the durable goods industries, however, average weekly earnings increased by three cents. In the nondurable goods industries, average weekly earnings dropped by seven cents from September to December. The decrease in average hourly earnings is probably due to the hiring of lower paid workers. In manufacturing industries, it is encouraging to note that average weekly hours increased from 39.1 hours in September to 41.2 hours in December. Most segments showed increases in average weekly hours. Average weekly earnings over the three-month period showed an increased of \$14.25, or 5.1 percent. Most segments also experienced increases in average weekly earnings.

In the published non-manufacturing industries, all showed increases in average weekly earnings and average hourly earnings. All except banking and communication showed increases in average hours worked per week.

NONAGRICULTURAL EMPLOYMENT: Total nonagricultural employment increased by 137,500 in the 4th quarter of 1982. Only in construction were three fewer jobs in December than in September. Manufacturing employment increased only in the month of November, with most of the 4,500 increase spread fairly evenly among all segments. The number of wholesale and retail trade jobs grew by 63,800 due to the Christmas shopping season and the beginning of the 1982-83 tourist season. The services industry picked up 46,800 jobs, primarily due to tourist-related factors.

Even though manufacturing employment began to pick up in the 4th quarter, December's level was still 21,700 below the December 1981 level of 471,100. Construction and government are also below their respective year-ago levels. However, the total nonfarm employment level in December 1982 was 168,300 above that of December 1981.

JOB OPENINGS: Below are the 20 occupations with the greatest number of job openings listed with Florida State Employment Service offices during the fourth quarter of 1982:

Occupations	Openings Received	Openings Filed	Average Hourly Wage Offered
General Clerk	4,041	3,531	\$3.45
Construction Worker I	2,664	1,752	4.13
Sales Clerk	1,647	642	3.37
Clerk-Typist	1,587	751	3.96
Material Handler	1,488	1,251	3.99
Cleaner, Commercial or Instit.	1,424	1,135	3.59
Cleaner, Housekeeping	1,276	600	3.53
Kitchen Helper	1,234	787	3.47
Secretary	1,229	341	4.64
Day Worker	1,170	1,039	4.20
Construction Worker II	1,162	970	4.48
Harvest Worker, Fruit	1,139	544	3.35
Farmworker, Vegetable II	1,092	520	3.35
Cook, Restaurant	942	571	3.91
Waiter/Waitress, Informal	887	453	3.46
Laborer, Stores	873	703	3.72
Carpenter	871	573	5.83
Counter Attendant, Lunchroom	800	578	3.37
Guard, Security	729	500	3.71
Maintenance Repairer, Building	683	425	4.27

Estimated Employment in Nonagricultural Establishments

1/ All industries are classified according to the Standard Industrial Classification Manual, 1977. Estimates include all full-time and part-time wage and salaried workers who were employed during the pay period including the 12th of the month, with the exception of federal employment for the Department of Defense, which is on an end-of-the month basis. Proprietors, self-employed persons domestic workers and military personnel of the armed forces are excluded. All data are adjusted to the first quarter 1981 benchmark levels.

LABOR MARKET INFORMATION

FLORIDA

Employment Statistics

Department of Labor and Employment Security Division of Employment Security

LABOR MARKET INDICATORS (12-month Averages)

State of Florida	Year Ending March 1983	Year Ending March 1982	Percent Change
Civilian Labor Force	4,768,500	4,545,800	4.9
Employment	4,357,500	4,220,500	3.2
Unemployment	411,000	325,300	26.3
Unemployment Rate	8.6	7.2	XXX
Nonagricultural Wage and Salary Employment	3,772,500	3,755,600	0.4
Unemployment Compensation			
Initial Claims	45,100	34,200	31.9
Insured Unemployment	92,100	64,200	43.5

LABOR MARKET INDICATORS: Despite consecutive monthly decreases in unemployment during February and March, unemployment remains on the rise in Florida when comparing the latest 12-month average labor market indicators. Total employment rose by only 3.2 percent from the year ending March 1982 to the year ending March 1983 while unemployment jumped by 26.3 percent. This resulted in the unemployment rate rising from 7.2 percent to 8.6 percent between the two periods. The number of initial claims filed for unemployment compensation remained well above the level of a year ago as did insured unemployment. These indicators showed increases of 31.9 percent and 43.5 percent, respectively. Despite the worsening labor market indicators in the state, Florida's latest 12-month average jobless rate of 8.6 percent was significantly below the nation's average rate of 10.1 percent for the same period.

LABOR FORCE SUMMARY

State of Florida	March 1983	February 1983	January 1983	December 1982
Civilian Labor Force	4,639,000	4,727,000	4,897,000	4,819,000
Employment	4,228,000	4,268,000	4,399,000	4,360,000
Unemployment	411,000	459,000	498,000	459,000
Unemployment Rate	8.9	9.7	10.2	9.5

Note: Data are taken from the monthly results of the Current Population Survey (CPS) and are primarily for use in allocation of money under various federal programs, including CETA. Data are seasonally adjusted.

THE NATION IN THE FIRST QUARTER: Unemployment nationwide has finally begun to come down after eleven consecutive months of rising, record-setting levels. The seasonally adjusted unemployment rate at the end of last year stood at 10.8 percent, the highest level in 40 years. In January, however, the rate fell to 10.4 percent and remained there through February. In March, the rate fell slightly to 10.3 percent. Unemployment in the U.S. should continue to decrease, but at a slow pace. Therefore, it has a long way to go before it reaches the 8.6 percent jobless rate recorded in January 1982, the last time before this year that a decrease occurred.

The first quarter 1983 average unemployment rates by major demographic characteristic were as follows: adult men, 9.7 percent; adult women, 8.9 percent; teenagers, 22.8 percent; whites, 9.1 percent; blacks, 20.1 percent; and Hispanics, 15.9 percent, the only category to show an increase over fourth quarter 1982.

In every month since May of last year, the jobless rate for adult women has fallen below the jobless rate for adult men. Currently, women are faring better than men in the job market for the first time since World War II. The current recession has been the sole reason. The two industries which are most affected by economic downturns are manufacturing and construction, industries which are heavily dominated by male workers. Traditional female occupations, however, are centered in the retail trade and services industries and are much less affected by recessionary conditions. The eventual end of the recession should put an end to this temporary trend as laid off manufacturing and construction workers get recalled or find other employment.

NONAGRICULTURAL EMPLOYMENT: Total nonfarm employment in Florida increased by a modest 0.3 percent from the end of the fourth quarter of 1982 to the end of the first quarter of 1983. This December-to-March increase of 11,700 jobs was made possible only because of a 21,500-job increase in the services industry over the quarter. The 2.3 percent rise in this industry was the only hefty increase of any major industry category. The number of jobs in the finance, insurance, and real estate industry rose by 1.0 percent, total government increased its job total by 0.9 percent, and the manufacturing industry recorded a 0.2 percent increase. All other major industry divisions experienced job losses over the quarter. Mining, although an insignificant industry in Florida, recorded a 6.2 percent drop in its job total. The total job level in the construction industry fell by 2.4 percent, the number of jobs in the transportation and public utilities division dropped by 2.0 percent, and the trade industry lost 0.8 percent of its jobs from December to March.

January was the only month in the first quarter in which an over-the-month decrease occurred in the total number of nonfarm jobs. This was due to the hiring of temporary workers for the holiday season in December and the subsequent termination of these jobs in January. Total nonfarm employment in Florida, if it follows past trends, will begin to drop slightly in April and continue a mild reduction through August. In September, employment will rebound and continue to rise steadily through the end of the year, reaching a peak in December.

1/ All industries are classified according to the Standard Industrial Classification Manual, 1977. Estimates include all full-time and part-time wage and salaried workers who were employed during the pay period including the 12th of the month, with the exception of federal employment for the Department of Defense, which is on an end-of-the month basis. Proprietors, self-employed persons domestic workers and military personnel of the armed forces are excluded. All data are adjusted to the first quarter 1981 benchmark levels.

These average earnings are computed on a "gross" basis and reflect changes in premium pay for overtime and late shift work as well as changes in basic hourly and incentive rates. Estimates are for all full-time production and related workers who are employed during the pay period including the 12th of the month.

Employment Statistics

Department of Labor and Employment Security Division of Employment Security

LABOR MARKET INDICATORS (12-month Averages)

State of Florida	Year Ending June 1983	Year Ending June 1982	Percent Change
Civilian Labor Force	4,804,400	4,588,500	4.7
Employment	4,379,100	4,243,600	3.2
Unemployment	425,300	344,900	23.3
Unemployment Rate	8.9	7.5	XXX
Nonagricultural Wage and Salary Employment	3,793,000	3,759,000	0.9
Unemployment Compensation			
Initial Claims	43,500	38,500	13.0
Insured Unemployment	89,100	72,600	22.7

LABOR MARKET INDICATORS: Average unemployment in Florida increased by a hefty 23.3 percent from the year ending June 1982 to the year ending June 1983. Total employment increased by only 3.2 percent between the two periods. As a result, the 12-month average unemployment rate rose from 7.5 percent to 8.9 percent. However, improvement may be just around the corner. Although the average number of initial claims filed for unemployment compensation rose by 13.0 percent and insured unemployment increased by 22.7 percent, these percentages are down significantly from those in last quarter's report. From the year ending March 1982 to the year ending March 1983, the percentage increases were 31.9 percent and 43.5 percent, respectively. Unemployment is expected to begin a gradual period of decline, based on these improving percentages.

LABOR FORCE SUMMARY

State of Florida	June 1983	May 1983	April 1983	March 1983
Civilian Labor Force	4,915,000	4,742,000	4,748,000	4,639,000
Employment	4,481,000	4,311,000	4,338,000	4,228,000
Unemployment	434,000	431,000	410,000	411,000
Unemployment Rate	8.8	9.1	8.6	8.9

Note: Data are taken from the monthly results of the Current Population Survey (CPS) and are primarily for use in allocation of money under various federal programs, including CETA. Data are seasonally adjusted.

THE NATION IN THE SECOND QUARTER: Unemployment nationwide continued its slow descent during the second quarter of 1983. January's 10.4 percent seasonally adjusted rate marked the first time in twelve months that a decrease occurred and the first quarter ended with a 10.3 percent jobless rate. In every month during the second quarter, the unemployment rate decreased by exactly one-tenth of a percentage point, falling to 10.0 percent at the close of the second quarter in June. This slow, steady decline should continue, but the jobless rate is not expected to reach pre-recession levels for a long while, based on the slow rate of recovery. However, beginning in July, double-digit rates will be a thing of the past.

Not all demographic groups enjoyed the mild reduction in unemployment during the second quarter. Adult men recorded a second quarter average unemployment rate of 9.4 percent, down from the first quarter average rate of 9.7 percent. The average rate for adult women decreased from 8.9 percent to 8.5 percent between the first and second quarters. Whites and persons of Hispanic origin each experienced a drop in their average jobless rate also, from 9.1 to 8.8 and from 15.9 to 14.1, respectively. However, the two highest demographic unemployment rates were the only two that rose over the quarter. Teenagers experienced a rate of 22.8 in the first quarter, but recorded a rate of 23.3 percent in the second quarter. The rate for blacks increased from 20.1 percent to 20.7 percent.

Below are the 20 occupations with the greatest number of job openings listed with Florida State Employment Service offices during the second quarter of 1983:

<u>Occupation</u>	<u>Openings Received</u>	<u>Openings Filled</u>	<u>Average Hourly Wage Offered</u>
General Clerk	6,734	1,019	\$3.81
Secretary	4,007	447	4.59
Construction Worker I	3,918	2,514	4.12
Material Handler	2,209	1,358	6.92
Clerk Typist	2,028	599	4.08
Cleaner, Housekeeping	1,751	1,150	3.57
Counter Attendant, Lunchroom	1,641	1,085	3.39
Cook	1,592	891	3.86
Carpenter	1,567	831	6.08
Helper, Kitchen	1,511	908	3.45
Construction Worker II	1,448	1,006	4.15
Teacher, Secondary School	1,425	1,358	6.92
Waiter/Waitress, Informal	1,417	733	3.50
Harvest Worker, Fruit	1,371	460	4.28
Laborers, Shores	1,347	890	3.84
Sales Clerk	1,293	309	3.52
Cleaner, Commercial or Instit.	1,193	647	3.79
Harvest Worker, Vegetable	1,155	642	3.39
Administrative Clerk	1,091	341	4.19
Nurse, School Attendant	1,064	79	3.41

**A Labor Market Information Publication
by the Florida Department of Labor and
Employment Security
Division of Employment Security**

This public document was promulgated at an annual cost of \$5,018.48, or \$.44 per copy, including postage, to provide current state labor market data and an analysis of changes in the state economy as required under the terms of the cooperative agreement between the Florida Department of Labor and Employment Security and the U.S. Department of Labor, Bureau of Labor Statistics.

1/ All industries are classified according to the Standard Industrial Classification Manual, 1977. Estimates include all full-time and part-time wage and salaried workers who were employed during the pay period including the 12th of the month, with the exception of federal employment for the Department of Defense, which is on an end-of-the-month basis. Proprietors, self-employed persons domestic workers and military personnel of the armed forces are excluded. All data are adjusted to the first quarter 1981 benchmark levels.

2/ Includes a miscellaneous group of agricultural service establishments and establishments elsewhere classified.
